FORM 10-Q NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Table dollars in thousands) (Unaudited)

NOTE 1. General

The significant accounting policies followed by First Merchants Corporation ("Corporation") and its wholly owned subsidiaries for interim financial reporting are consistent with the accounting policies followed for annual financial reporting. All adjustments which are of a normal recurring nature and are in the opinion of management necessary for a fair statement of the results for the periods reported have been included in the accompanying consolidated condensed financial statements.

The consolidated condensed balance sheet of the Corporation as of December 31, 2002 has been derived from the audited consolidated balance sheet of the Corporation as of that date. Certain information and note disclosures normally included in the Corporation's annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These consolidated condensed financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Corporation's Form 10-K annual report filed with the Securities and Exchange Commission.

The results of operations for the period are not necessarily indicative of the results to be expected for the year.

Stock options are granted for a fixed number of shares to employees. The Corporation's stock option plans are accounted for in accordance with Accounting Principles Board Opinion ("APB") No. 25, Accounting for Stock Issued to Employees, and related interpretations. APB No. 25 requires compensation expense for stock options to be recognized only if the market price of the underlying stock exceeds the exercise price on the date of the grant. Accordingly, the Corporation recognized compensation expense of \$2,000 for the three months ended September 30, 2003 and \$12,000 for the nine months ended September 30, 2003, related to specific grants in which the market price exceeded the exercise price. For all remaining grants, no stock-based employee compensation cost is reflected in net income, as options granted under those plans had an exercise price equal to the market value of the underlying common stock on the grant date.

The following table illustrates the effect on net income and earnings per share if the Corporation has applied the fair value provisions of FASB Statement No. 123, Accounting for Stock-Based Compensation, to stock-based employee compensation.

Options to purchase 167,483 and 237,534 shares for the three months ended September 30, 2003 and 2002 and options to purchase 289,909 and 134,341 shares for the nine months ended September 30, 2003 were not included in the earnings per share calculation because the exercise price exceeded the average market price.

FORM 10-Q NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (Table dollars in thousands) (Unaudited)

NOTE 1. General (continued)

The Corporation makes its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, available on its website at www.firstmerchants.com without charge, as soon as reasonably practicable after such reports are electronically filed with, or furnished to, the Securities and Exchange Commission. Additionally, upon request the Corporation will also provide without charge, a copy of its Form 10-Q to any shareholder by mail. Requests should be sent to Mr. Brian Edwards, Shareholder Relations Officer, First Merchants Corporation, P.O. Box 792, Muncie, IN 47308-0792.

NOTE 2. Accounting Matters

Statement of Financial Accounting Standards No. 150, "Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity" was issued in May of 2003 and is effective for financial instruments entered into or modified after May 31, 2003. This statement establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability. The Corporation currently classifies its obligated mandatory redeemable capital securities and cumulative trust preferred securities as liabilities. Therefore, this pronouncement has no impact on the Corporation's financial statements.

NOTE 3. Business Combinations

On March 1, 2003, the Corporation acquired 100% of the outstanding stock of CNBC Bancorp, the holding company of Commerce National Bank ("Commerce National"), CNBC Retirement Services, Inc. ("CRS, Inc.") and CNBC Statutory Trust I (the "Trust"). Commerce National is a national chartered bank located in Columbus, Ohio. CNBC Bancorp was merged into the Corporation, and Commerce National maintained its national charter as a wholly-owned subsidiary of the Corporation. CRS, Inc. and the Trust are also maintained as wholly-owned subsidiaries of the Corporation. The Corporation issued approximately 1,166,897 shares of its common stock and approximately \$24,562,000 in cash to complete the transaction. As a result of the acquisition, the Corporation will have an opportunity to increase its customer base and continue to increase its market share. The purchase had a recorded acquisition price of \$55,729,000, including goodwill of \$30,291,000 none of which is deductible for tax purposes. Additionally, core deposit intangibles totaling \$8,171,000 were recognized and will be amortized over 10 years using the 150% declining balance method.

The combination was accounted for under the purchase method of accounting. All assets and liabilities were recorded at their fair values as of March 1, 2003. The purchase accounting adjustments will be amortized over the life of the respective asset or liability. Commerce National's results of operations are included in the Corporation's consolidated income statement beginning March 1, 2003. The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition.

Effective January 1, 2003, the Corporation formed Merchants Trust Company, National Association ("MTC"), a wholly-owned subsidiary of the Corporation, through a capital contribution totaling approximately \$2,038,000. On January 1, 2003, MTC purchased the trust operations of First Merchants Bank, N.A., First National Bank and Lafayette Bank and Trust Company for a fair value acquisition price of \$20,687,000. MTC unites the trust and asset management services of all affiliate banks of the Corporation. All intercompany transactions related to this purchase by MTC have been eliminated in the consolidated condensed financial statements of the Corporation.

Note 7. Borrowings

CUMULATIVE TRUST PREFERRED SECURITIES

In April 2002, the Corporation and FMC Trust I (the "Trust") entered into an Underwriting Agreement with Stifel, Nicolaus & Company, Incorporated and RBC Dain Rauscher, Inc. for themselves and as co-representatives for several other underwriters (the "Underwriting Agreement"). In April 2002, and pursuant to the Underwriting Agreement, the Trust issued 2,127,500 8.75% Cumulative Trust Preferred Securities (liquidation amount \$25 per Preferred Security) (the "Preferred Securities") with an aggregate liquidation value of \$53,187,500. The proceeds from the sale of the Preferred Securities were invested by the Trust in the Corporation's 8.75% Junior Subordinated Debentures due June 30, 2032 (the "Debentures"). The Preferred Securities are recorded as borrowings in the Corporation's consolidated September 30, 2003, balance sheet and treated as Tier 1 Capital for regulatory capital purposes. The Debentures will mature and the Preferred Securities must be redeemed on June 30, 2032. The Trust has the option of shortening the maturity date to a date not earlier than June 30, 2007, requiring prior approval of the Board of Governors of the Federal Reserve System.

OBLIGATED MANDATORY REDEEMABLE CAPITAL SECURITIES

As part of the March 1, 2003, acquisition of CNBC Bancorp ("CNBC"), referenced in Note 3 to the consolidated condensed financial statements, the Corporation assumed \$4.0 million of 10.20% fixed rate obligated mandatory redeemable capital securities issued in February 2001 through a subsidiary trust of CNBC as part of a pooled offering. The Corporation may redeem them, in whole or in part, at its option commencing February 22, 2011, at a redemption price of 105.10% of the outstanding principal amount and, thereafter, at a premium which declines annually. On or after February 22, 2021, the securities may be redeemed at face value with prior approval of the Board of Governors of the Federal Reserve System. The securities are recorded as borrowings in the Corporation's consolidated September 30, 2003, balance sheet and treated as Tier 1 Capital for regulatory capital purposes.

SUBORDINATED DEBENTURES, REVOLVING CREDIT LINES AND TERM LOANS

On September 30, 2003, other borrowed funds included \$40,594,000 which represents the outstanding balance of a Loan and Subordinated Debenture Loan Agreement entered into with LaSalle Bank, N.A. on March 25, 2003. The Agreement includes three credit facilities:

- * The Term Loan of \$5,000,000 matures on March 25, 2010. Interest is calculated at a floating rate equal to the lender's prime rate or LIBOR plus 1.50%. The Term Loan is secured by 100% of the common stock of First Merchants Bank, National Association, Muncie, Indiana and 100% of the common stock of Lafayette Bank and Trust Company, Lafayette, Indiana. The Agreement contains several restrictive covenants, including the maintenance of various capital adequacy levels, asset quality and profitability ratios, and certain restrictions on dividends and other indebtedness.
- * The Revolving Loan had a balance of \$10,594,000 at September 30, 2003. Interest is payable quarterly based on LIBOR plus 1%. Principal and interest are due on or before March 23, 2004. The total principal amount outstanding at any one time may not exceed \$20,000,000.
- * The Subordinated Debt of \$25,000,000 matures on March 25, 2010. Interest is calculated at a floating rate equal to, at the Corporation's option, either the lender's prime rate or LIBOR plus 2.50%. The Agreement is secured by 100% of the common stock of First Merchants Bank, National Association, Muncie, Indiana and 100% of the common stock of Lafayette Bank and Trust Company, Lafayette, Indiana. The Agreement contains several restrictive covenants, including the maintenance of various capital adequacy levels, asset quality and profitability ratios, and certain restrictions on dividends and other indebtedness. The Subordinated Debentures are recorded as borrowings in the Corporation's consolidated balance sheet and treated as Tier 2 capital for regulatory capital purposes.

FORWARD-LOOKING STATEMENTS

The Corporation from time to time includes forward-looking statements in its oral and written communication. The Corporation may include forward-looking statements in filings with the Securities and Exchange Commission, such as this Form 10-Q, in other written materials and in oral statements made by senior management to analysts, investors, representatives of the media and others. The Corporation intends these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and the Corporation is including this statement for purposes of these safe harbor provisions. Forward-looking statements can often be identified by the use of words like "estimate," "project," "intend," "anticipate," "expect" and similar expressions. These forward-looking statements include:

- * statements of the Corporation's goals, intentions and expectations;
- * statements regarding the Corporation's business plan and growth strategies;
- * statements regarding the asset quality of the Corporation's loan and investment portfolios; and
- * estimates of the Corporation's risks and future costs and benefits.

These forward-looking statements are subject to significant risks, assumptions and uncertainties, including, among other things, the following important factors which could affect the actual outcome of future events:

- * fluctuations in market rates of interest and loan and deposit pricing, which could negatively affect the Corporation's net interest margin, asset valuations and expense expectations;
- * adverse changes in the Indiana and Ohio economies, which might affect the Corporation's business prospects and could cause credit-related losses and expenses;
- * adverse developments in the Corporation's loan and investment portfolios;
- * competitive factors in the banking industry, such as the trend towards consolidation in the Corporation's market; and
- * changes in the banking legislation or the regulatory requirements of federal and state agencies applicable to bank holding companies and banks like the Corporation's affiliate banks.

Because of these and other uncertainties, the Corporation's actual future results may be materially different from the results indicated by these forward-looking statements. In addition, the Corporation's past results of operations do not necessarily indicate its future results.

CRITICAL ACCOUNTING POLICIES

Generally accepted accounting principles are complex and require management to apply significant judgments to various accounting, reporting and disclosure matters. Management of the Corporation must use assumptions and estimates to apply these principles where actual measurement is not possible or practical. For a complete discussion of the Corporation's significant accounting policies, see "Notes to the Consolidated Financial Statements" in the Corporation's 2002 Annual Report on pages 23 to 27. Certain policies are considered critical because they are highly dependent upon subjective or complex judgments, assumptions and estimates. Changes in such estimates may have a significant impact on the financial statements. Management has reviewed the application of these policies with the Audit Committee of the Corporation's Board of Directors. For a discussion of applying critical accounting policies, see "Critical Accounting Policies" on page 4 in the Corporation's 2002 Annual Report.

RESULTS OF OPERATIONS

Net income for the three months ended September 30, 2003, equaled \$7,349,000, compared to \$7,827,000 in the same period of 2002. Diluted earnings per share were \$.39 a decrease of \$.07 from the \$.46 reported for the third quarter 2002.

Net income for the nine months ended September 30, 2003, equaled \$21,752,000, compared to \$21,240,000 during the same period in 2002. Diluted earnings per share were \$1.19, a 8.6% decrease from \$1.31 in 2002.

Annualized returns on average assets and average stockholders' equity for nine months ended September 30, 2003 were .99 percent and 9.98 percent, respectively, compared with 1.22 percent and 12.45 percent for the same period of 2002.

The declines in diluted earnings per share, return on equity and return on assets are primarily due to increased provision for loan losses, which is discussed in the "ASSET QUALITY/PROVISION FOR LOAN LOSSES" section of Management's Discussion & Analysis of Financial Condition and Results of Operations.

FORM 10-0

CAPITAL

The Corporation's capital continues to exceed regulatory minimums and management believes that its capital levels continue to be a distinct advantage in the competitive environment in which the Corporation operates.

The Corporation's Tier I capital to average assets ratio was 7.9 percent at year-end 2002 and 7.3 percent at September 30, 2003. At September 30, 2003, the Corporation had a Tier I risk-based capital ratio of 9.3 percent and total risk-based capital ratio of 11.7 percent. Regulatory capital guidelines require a Tier I risk-based capital ratio of 4.0 percent and a total risk-based capital ratio of 8.0 percent. Banks with Tier I risk-based capital ratios of 6.0 percent and total risk-based capital ratios of 10.0 percent are considered "well capitalized."

ASSET OUALITY/PROVISION FOR LOAN LOSSES

The allowance for loan losses is maintained through the provision for loan losses, which is a charge against earnings. The amount provided for loan losses and the determination of the adequacy of the allowance are based on a continuous review of the loan portfolio, including an internally administered loan "watch" list and an independent loan review provided by an outside accounting firm. The evaluation takes into consideration identified credit problems, as well as the possibility of losses inherent in the loan portfolio that are not specifically identified. (See the "CRITICAL ACCOUNTING POLICIES" section of Management's Discussion & Analysis of Financial Condition and Results of Operations).

At September 30, 2003, non-performing loans totaled \$25,530,000, an increase during the period of \$2,212,000 from December 31, 2002, as noted in the table on the following page. This increase was primarily due to two loans totaling \$7,167,000, related to declining collateral values of a single borrower, being placed on non-accrual status, while loans 90 days past due other than non-accrual and restructured loans decreased by \$3,747,000.

At September 30, 2003, impaired loans totaled \$44,905,000, an increase of \$554,000 from December 31, 2002. At September 30, 2003, an allowance for losses was not deemed necessary for impaired loans totaling \$30,364,000, but an allowance of \$7,510,000 was recorded for the remaining balance of impaired loans of \$14,541,000 and is included in the Corporation's allowance for loan losses. The average balance of impaired loans for the first nine months of 2003 was \$49,537,000.

At December 31, 2002, impaired loans totaled \$44,351,000. An allowance for losses was not deemed necessary for impaired loans totaling \$27,450,000, but an allowance of \$7,299,000 was recorded for the remaining balance of impaired loans of \$16,901,000 and is included in the Corporation's allowance for loan losses. The average balance of impaired loans for 2002 was \$49,663,000.

At September 30, 2003, the allowance for loan losses was \$29,842,000, an increase of \$7,695,000 from year end 2002. As a percent of loans, the allowance was 1.26 percent at September 30, 2003 compared with 1.11 percent at December 31, 2002.

FORM 10-Q

The provision for loan losses for the first nine months of 2003 was \$8,430,000, an increase of \$4,133,000 from \$4,297,000 for the same period in 2002. The Corporation's adequacy of the allowance for loan losses reflects increased non-performing loans, increased specific reserves and increased impaired loans, resulting in increased provision expense. Of the \$4.1 million increase, \$2.8 million is due to declining collateral values of a single commercial borrower, with the remaining based on the regular ongoing evaluation of the loan portfolios of the Corporation's bank subsidiaries. Current non-performing and impaired loan balances indicate that some decline in loan asset quality has occurred, which management believes is a result of current economic conditions.

The following table summarizes the non-accrual, contractually past due 90 days or more other than non-accruing and restructured loans for the Corporation.

FORM 10-Q

LIOUIDITY

Liquidity management is the process by which the Corporation ensures that adequate liquid funds are available for the Corporation and its subsidiaries. These funds are necessary in order for the Corporation and its subsidiaries to meet financial commitments on a timely basis. These commitments include withdrawals by depositors, funding credit obligations to borrowers, paying dividends to shareholders, paying operating expenses, funding capital expenditures, and maintaining deposit reserve requirements. Liquidity is monitored and closely managed by the asset/liability committees at each subsidiary and by the Corporation's asset/liability committee.

The liquidity of the Corporation is dependent upon the receipt of dividends from its bank subsidiaries, which are subject to certain regulatory limitations and access to other funding sources. Liquidity of the Corporation's bank subsidiaries is derived primarily from core deposit growth, principal payments received on loans, the sale and maturity of investment securities, net cash provided by operating activities, and access to other funding sources. The most stable source of liability-funded liquidity for both the long-term and short-term is deposit growth and retention in the core deposit base. In addition, the Corporation utilizes advances from the Federal Home Loan Bank ("FHLB") and a revolving line of credit with LaSalle Bank, N.A. as a funding course. At Sentember 20, 2002, total horsestates the first the fi source. At September 30, 2003, total borrowings from the FHLB were \$211,369,000. The Corporation's bank subsidiaries have pledged certain mortgage loans and certain investments to the FHLB. The total available remaining borrowing capacity from the FHLB at September 30, 2003, was \$203,255,000. At September 30, 2003, the Corporation's revolving line of credit had a balance of \$10,594,000 and a remaining borrowing capacity of \$9,406,000. The principal source of asset-funded liquidity is investment securities classified as available-for-sale, the market values of which totaled \$308,832,000 at September 30, 2003, a decrease of \$24,093,000 or 6.5% over December 31, 2002. Securities classified as held-to-maturity that are maturing within a short period of time can also be a source of liquidity. Securities classified as held-to-maturity and that are maturing in one year or less totaled \$1,415,000 at September 30, 2003. In addition, other types of assets such as cash and due from banks, federal funds sold and securities purchased under agreements to resell, and loans and interest-bearing deposits with other banks maturing within one year are sources of liquidity.

In the normal course of business, the Corporation is a party to a number of other off-balance sheet activities that contain credit, market and operational risk that are not reflected in whole or in part in the Corporation's consolidated financial statements. Such activities include: traditional off-balance sheet credit-related financial instruments, commitments under operating leases and long-term debt.

The Corporation provides customers with off-balance sheet credit support through loan commitments and standby letters of credit. Summarized credit-related financial instruments at September 30, 2003 are as follows:

| (Dollars in thousands) | ٩t | September 2003 | 30, |
|--|----|-------------------|-----|
| Amounts of commitments: Loan commitments to extend credit | | | |
| | 9 | \$ 454,000 | |

Since many of the commitments are expected to expire unused or be only partially used, the total amount of unused commitments in the preceding table does not necessarily represent future cash requirements.

In addition to owned banking facilities, the Corporation has entered into a number of long-term leasing arrangements to support the ongoing activities of the Corporation. The required payments under such commitments and long-term debt at September 30, 2003 are as follows:

| (Dollars in thousands) | 2003 remaining | 2004 | 2005 | 2006 | 2007 | 2008 and after | Total |

FORM 10-0

INTEREST SENSITIVITY AND DISCLOSURES ABOUT MARKET RISK

Asset/Liability Management has been an important factor in the Corporation's ability to record consistent earnings growth through periods of interest rate volatility and product deregulation. Management and the Board of Directors monitor the Corporation's liquidity and interest sensitivity positions at regular meetings to review how changes in interest rates may affect earnings. Decisions regarding investment and the pricing of loan and deposit products are made after analysis of reports designed to measure liquidity, rate sensitivity, the Corporation's exposure to changes in net interest income given various rate scenarios and the economic and competitive environments.

It is the objective of the Corporation to monitor and manage risk exposure to net interest income caused by changes in interest rates. It is the goal of the Corporation's Asset Liability function to provide optimum and stable net interest income. To accomplish this, management uses two asset liability tools. GAP/Interest Rate Sensitivity Reports and Net Interest Income Simulation Modeling are both constructed, presented, and monitored quarterly.

Management believes that the Corporation's liquidity and interest sensitivity position at September 30, 2003, remained adequate to meet the Corporation's primary goal of achieving optimum interest margins while avoiding undue interest rate risk.

The Corporation places its greatest credence in net interest income simulation modeling. The GAP/Interest Rate Sensitivity Report is believed by the Corporation's management to have two major shortfalls. The GAP/Interest Rate Sensitivity Report fails to precisely gauge how often an interest rate sensitive product reprices, nor is it able to measure the magnitude of potential future rate movements.

Net interest income simulation modeling, or earnings-at-risk, measures the sensitivity of net interest income to various interest rate movements. The Corporation's asset liability process monitors simulated net interest income under three separate interest rate scenarios; base, rising and falling. Estimated net interest income for each scenario is calculated over a 12-month horizon. The immediate and parallel changes to the base case scenario used in the model are presented below. The interest rate scenarios are used for analytical purposes and do not necessarily represent management's view of future market movements. Rather, these are intended to provide a measure of the degree of volatility interest rate movements may introduce into the earnings of the Corporation.

The base scenario is highly dependent on numerous assumptions embedded in the model, including assumptions related to future interest rates. While the base sensitivity analysis incorporates management's best estimate of interest rate and balance sheet dynamics under various market rate movements, the actual behavior and resulting earnings impact will likely differ from that projected. For mortgage-related assets, the base simulation model captures the expected prepayment behavior under changing interest rate environments. Assumptions and methodologies regarding the interest rate or balance behavior of indeterminate maturity products, e.g., savings, money market, NOW and demand deposits reflect management's best estimate of expected future behavior.

FORM 10-Q

The comparative rising and falling scenarios for the period ended September 30, 2004 assume further interest rate changes in addition to the base simulation discussed above. These changes are immediate and parallel changes to the base case senario. In addition, total rate movements (beginning point minus ending point) to each of the various driver rates utilized by management in the base simulation for the period ended September 30, 2004 are as follows:

| Driver Rates | RISING | FALLING |
|-------------------|------------------|-------------------|
| Prime | 200 Basis Points | (50) Basis Points |
| Federal Funds | 200 | (50) |

Results for the base, rising and falling interest rate scenarios are listed below, based upon the Corporation's rate sensitive assets at September 30, 2003. The net interest income shown represents cumulative net interest income over a 12-month time horizon. Balance sheet assumptions used for the base scenario are the same for the rising and falling simulations.

The comparative rising and falling scenarios for the period ended December 31, 2003 assume further interest rate changes in addition to the base simulation discussed above. These changes are immediate and parallel changes to the base case scenario. In addition, total rate movements (beginning point minus ending point) to each of the various driver rates utilized by management in the base simulation for the period ended December 31, 2003 are as follows:

| Driver Rates | RISING | FALLING |

Results for the base, rising and falling interest rate scenarios are listed below, based upon the Corporation's rate sensitive assets at December 31, 2002. The net interest income shown represents cumulative net interest income over a 12-month time horizon. Balance sheet assumptions used for the base scenario are the same for the rising and falling simulations.

EARNING ASSETS

The following table presents the earning asset mix as of September 30, 2003, and December 31, 2002.

Loans grew approximately \$347 million from December 31, 2002 to September 30, 2003, while investment securities decreased by \$25.2 million during the same period. \$309.5 million of the increase in loans is attributable to the March 1, 2003 acquisition of CNBC Bancorp. Excluding increases related to this acquisition, loans increased by \$37.5 million and investments decreased by \$38 million during the nine month period.

The Corporation has continued to leverage its capital position with Federal Home Loan Bank advances, as well as, repurchase agreements which are pledged against acquired investment securities as collateral for the borrowings. Trust preferred securities are classified as Tier I Capital and the Subordinated Debenture of \$25,000,000 is classified as Tier II Capital when computing risk based capital ratios due to the long-term nature of the investment. The interest rate risk is included as part of the Corporation's interest simulation discussed in Management's Discussion and Analysis under the headings "LIQUIDITY" and "INTEREST SENSITIVITY AND DISCLOSURES ABOUT MARKET RISK".

NET INTEREST INCOME

Net Interest Income is the primary source of the Corporation's earnings. It is a function of net interest margin and the level of average earning assets. The table below presents the Corporation's asset yields, interest expense, and net interest income as a percent of average earning assets for the three and nine months ended September 30, 2003 and 2002.

Annualized net interest income (FTE)for the nine months ended September 30, 2003 increased by \$13.7 million, or 14.6 percent over the same period in 2002, due to an increase in average earning assets of over \$516 million. For the same period interest income and interest expense, as a percent of average earning assets, decreased 83 basis points and 49 basis points respectively.

OTHER INCOME

The Corporation has placed emphasis on the growth of non-interest income in recent years by offering a wide range of fee-based services. Fee schedules are regularly reviewed by a pricing committee to ensure that the products and services offered by the Corporation are priced to be competitive and profitable.

Other income in the third $\,$ quarter of 2003 exceeded the same quarter in the prior year by \$1,230,000, or 16.1 percent.

One major area accounts for most of the increase. Gains on sales of mortgage loans included in other income increased by \$876,000 due to increased mortgage volume. In addition, decreasing mortgage loan rates caused an increase in refinancing volume, which facilitated an increase in loan sales activity.

Other income for the first nine months of 2003 exceeded the same period in the prior year by \$8,454,000 or 42.6 percent.

Five major areas account for most of the increase:

- Gains on sales of mortgage loans included in other income increased by \$4,628,000 due to increased mortgage volume. In addition, decreasing mortgage loan rates caused an increase in refinancing volume, which facilitated an increase in loan sales activity.
- 2. Service charges on deposit accounts increased \$1,753,000 or 26.4 percent due to increased number of accounts, price adjustments and approximately \$948,000 of additional service charge income related to April 1, 2002 acquisition of Lafayette.
- 3. A gain on life insurance proceeds included in other income was \$535,000 for the first nine months of 2003 compared to \$0 for the same period last year. The gain represented the net insurance proceeds received.
- 4. Insurance Commissions increased by \$483,000 or 37.9 percent primarily as a result of the September 6, 2002 acquisition of Stephenson Insurance Services, Inc.
- 5. Revenues from fiduciary activities increased \$362,000 or 7.6 percent due primarily to the additional fees related to the acquisition of Lafayette.

FORM 10-0

OTHER EXPENSES

Total other expenses represent non-interest operating expenses of the Corporation. Total other expense during the third quarter of 2003 exceeded the same period of the prior year by \$3,773,000, or 19.7 percent.

Two major areas account for most of the increase:

- Salaries and benefit expense grew \$2,601,000 or 24.5 percent, due to normal salary increases, staff additions and additional salary cost related to the March 1, 2003 acquisition of Commerce National Bank.
- Net occupancy expenses increased by \$190,000 or 19.0 percent primarily due to the acquisition of Commerce National Bank.

Total other expenses during the first nine $\,$ months in 2003 exceeded the same period of the prior year by \$16,207,000, or 31.7 percent.

Six major areas account for most of the increase:

- Salaries and benefit expense grew \$9,585,000 or 33.9 percent, due to normal salary increases, staff additions and additional salary cost related to the April 1, 2002 acquisition of Lafayette and the March 1, 2003 acquisition of Commerce National Bank.
- Net occupancy expenses increased by \$781,000 or 28.9 percent primarily due to the acquisitions of Lafayette and Commerce National Bank.
- 3. Equipment expense increased by \$1,008,000 or 20.8 percent primarily due to the acquisitions of Lafayette and Commerce National Bank.
- 4. Core deposit intangible amortization increased by \$940,000, due to utilization of the purchase method of accounting for the Corporation related to the acquisitions of Lafayette and Commerce National Bank.
- 5. The Corporation accrued \$460,000 in anticipation of a settlement from a claim made against First Merchants Corporation, which is presently being negotiated.
- 6. Prepayment penalties for early prepayment of FHLB advances increased by \$340,000 for the first nine months of 2003 over the same period in 2002.

FORM 10-0

INCOME TAXES

Income tax expense, for the nine months ended September 30, 2003, decreased by \$1,247,000 from the same period in 2002. The effective tax rate was 28.4 and 34.1 percent for the 2003 and 2002 periods. Most of this decrease is a result of increases in tax exempt earnings from bank-owned life insurance contracts, tax exempt interest income and reduced state taxes, resulting from the effect of state income apportionment.
